Expertise

I am a Software Engineer specialised in front-end technologies.

I've worked most of my career on e-commerce applications serving thousands customers daily, gaining good knowledge of best practices in the field of **accessibility**, **security** and **performance**.

I've experience working with small/medium -sized teams, onsite and remote, following SCRUM principles.

Tech

HTML, CSS and **JavaScript**
node.js, electron
TypeScript
React
Webpack, rollup.js
Jest, unit tests
git

Roles & responsibilities

2019 - Software Developer, Independent

Collaborating with different teams in Europe, and on different kind of projects.

Working with different teams permitted me to see different approaches at work and measure tradeoffs first hand.
I bring this expertise to my customers.

2018 - Tech Lead, YNAP

- Leading technical analysis, design and implementation of business requests.
- Promoting industry best practices, such as unit tests, code reviews, etc.
- Providing analysis and support during production incident using tools such as Kibana, Dynatrace, etc.

2014 - Sr. Software Developer, YNAP

- Analysis and implementation of cross store features, bug fixes, and automatic tests for YNAP proprietary e-commerce front-end platform.
- Guiding the evolution of YOOX front-end framework.

2012 - Software Developer, GetConnected

- Consultant: working on YNAP legacy e-commerce front-end framework.

2011 - Analyst, Reply

- Consultant: working together the development team on requirements for Fastweb network inventory.

Studies

Alma Mater Studiorum, Bologna
Telecommunication Engineering
September 2005 ~ February 2011

I got a master degree in Telecommunication Engineering.

The degree course included both Computer Science exams and electronics exams.

I graduated with the final vote of 110/110 cum laude within the regular time.
